### DETAILED ACTION

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The "weight ratio of (a) to (b) is from about 1:1 to about 1:10" in lines 1-2 of claim 4 is broader than the ratio of "(a) to (b) is 1:1 to 1:10" of claim 1 and therefore is indefinite.

Claims 5-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 (and its dependent claims) depends on claim 4 that is indefinite and therefore is indefinite for the same reason. The phrase "such fluid" in line 2 of claim 5 is indefinite and may be overcome with the substitution of the following phrase ---said fluid---

Claim 7 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In line 2 of claim 7 the phrase "based on component (s)" is indefinite and confusing because it is unclear what is the intended component(s). Clarification to the record is required.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Burlew 6,042,750.

Burlew teaches a method and composition for inhibiting corrosion comprising (a) fatty acid ester and (b) polyethylene glycol esters, note example 1, claim 1, column 1, lines 4-8, column 1, line 65 to column 2, lines 1-14, column 2, line 55 to column 2, lines 1-5, column 3, lines 30-37 that anticipates the instant claims.

The prior art cited but not relied upon further teaches corrosion composition of the same nature as claimed by applicants.
